

USE-CASE FLOW SPECIFICATION

Problem Statement #34: Digital Gift Card & Loyalty Point Exchange

Name: Girish G N | SRN: PES1UG24CS571

Use Case: UC-04 — Redeem Gift Card at Merchant

Goal: Allow the Account Holder to redeem eligible digital gift cards using universal exchange credits.

Preconditions

- The Account Holder is logged into the digital wallet platform.
- The Account Holder has sufficient universal exchange credits.
- An eligible digital gift card is available for redemption.

Postconditions

- The required exchange credits are deducted from the Account Holder's balance.
- The digital voucher is generated, locked, and recorded as a single-use voucher.
- The successful redemption is recorded in the system.

Main Success Scenario

1. Account Holder selects "Redeem Gift Card at Merchant".
2. System displays available eligible digital gift cards.
3. Account Holder selects a gift card.
4. System displays the required universal exchange credits.
5. Account Holder confirms the redemption.
6. System checks that the Account Holder has sufficient exchange credits.
7. System validates the gift-card redemption request and verifies the voucher.
8. System locks the voucher to prevent duplicate redemption.
9. System deducts the required exchange credits.
10. System generates/displays the single-use digital voucher code.
11. System records the successful redemption and ends the use case.

Alternate Flow — Insufficient Exchange Credits

- AF1.1 At Step 6, the system determines that the Account Holder has insufficient exchange credits.
- AF1.2 The system rejects the redemption request.
- AF1.3 The system displays the required credits and the available balance.
- AF1.4 No exchange credits are deducted and no voucher is issued.
- AF1.5 The use case ends.

Alternate Flow — Invalid or Previously Redeemed Voucher

- AF2.1 At Step 7, the system detects that the voucher is expired or has already been redeemed.
- AF2.2 The system rejects the redemption and does not deduct exchange credits.
- AF2.3 The system displays an appropriate failure message.
- AF2.4 The use case ends.
